

# Food & Yard Waste

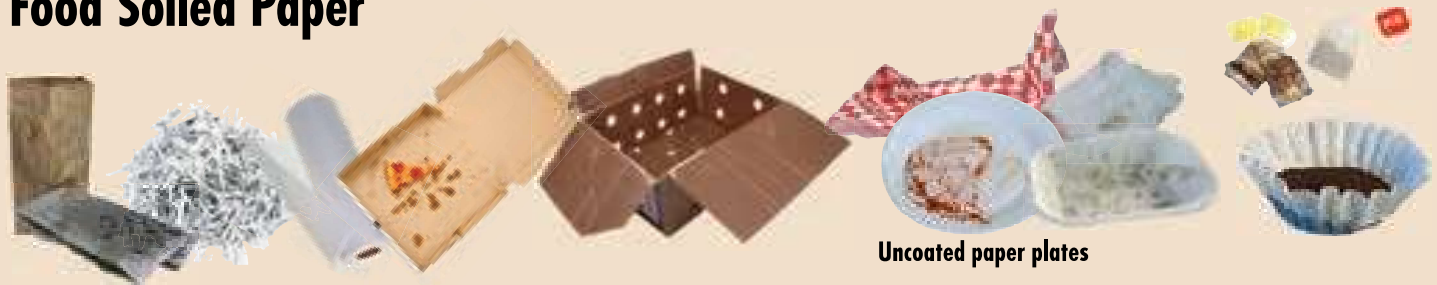

Put These Items in Your Compost Bin

## Food Scraps

## Food Soiled Paper

Uncoated paper plates

## Plant & Yard Waste

Untreated

## Certified Compostable Products

### Why Compost?

**Reduce Waste** – Nearly a third of local waste is food and yard waste. Let's keep compostables out of the landfill and put the finished compost to use growing more food and vegetation.

**Support Local Food** – Support local growers by making sure they have local sources of quality compost to naturally replenish their soils.

**Healthier Environment** – Organics decomposing in landfills create methane – a greenhouse gas 20x more potent than CO2. Reduce greenhouse gases by composting.
